

# THE FIELD GUIDE TO CONNECTING WORLDS.

A practical philosophy of linked ideas, evidence-aware exploration, and making something from the connections you notice.

# From inventory to universe

The difference between a folder of links and a knowledge world is not visual effects. It is the way the links allow questions, contrasts, and unexpected bridges to emerge.

## 01 INVENTORY

A link plus its title, source, check state, and provenance.

## 02 RELATIONSHIPS

Curated citations where possible; heuristic suggestions clearly labeled.

## 03 EXPERIENCES

Questions, navigable paths, simulations, and visitor-made interpretations.

The Atlas sheet is your source register. The Reactor is a public-facing interpretation. Neither should overwrite the other. Separate factual relationships from promising analogies.

# Never confuse HTTP with truth

The source workbook contains 436 raw addresses, not 436 confirmed successful experiences. A crawler can mistake JavaScript fragments for links. The Reactor therefore keeps its curation logic visible.

436 311

RAW COLLECTED ADDRESSES    DISTINCT USABLE URL FORMS

At extraction: 196 HTTP working, 120 broken, 52 could not connect, 68 manual review in the raw workbook. After structural filtering: 165 retained entries had a recorded HTTP response.

## A THREE-PART VERIFICATION LADDER

### 01 ADDRESS VALIDITY

Is this syntactically a real web destination, not a code snippet?

### 02 HTTP CHECK

Did the network return an HTTP response at the moment checked?

### 03 BROWSER QA

Does it render, navigate, respect accessibility, and contain expected content?

Always timestamp states. Never convert an inferred relationship into an authoritative citation. Never publicly publish a private link simply because it appears in a source registry.

# Ideas make better neighbours

Select a question, cross disciplines, and return with a tension rather than a manufactured conclusion.

## 01 EDUCATION WITHOUT SCORES

Education / Learning / Work

## 02 SCENT AS WITNESS

Perfume / Memory / Consciousness

## 03 THE PRICE OF APPROVAL

Achievement / Agency / Connection

## 04 NORMAL IS NEGOTIATED

Madness / Psychology / Relationships

## 05 THE KIRANA LABORATORY

Everyday trade / Trust / Systems

## 06 FREEDOM AND FRICTION

Identity / Attention / Autonomy

# How to keep it alive

A finite set of useful habits for a universe that is allowed to remain unfinished.

- 1 Ask a question before you choose a link.

---
- 2 Make two interpretations compete.

---
- 3 Distinguish the original source from your inference.

---
- 4 Explain why each cross-link helps the visitor.

---
- 5 Keep an unfashionable idea in the constellation.

---
- 6 Invite people to disagree without humiliating them.

---
- 7 Test real buttons on mobile and with a keyboard.

---
- 8 Record what failed, not just what shipped.

---
